Experience

Codifly It Solution Aug 2025 - Present

Front-end Engineer *Jaipur, Rajasthan*

- Developed and maintained **end-to-end web applications** using **React.js**, **Next.js**, and **Redux** for state management
- Built **reusable UI components** and optimized performance to improve page load speed and user experience.
- Improved application performance through **code optimization**, lazy loading, and effective state handling.
- **Collaborated closely with backend teams and designers to implement responsive and scalable product features.** Integrated RESTful APIs and handled **dynamic data rendering** across multiple product modules.

AssessPrep (Product-Based EdTech Company) Jan 2024 - Jun 2025

Software Engineer *Gurgaon, Haryana*

- Developed a feature to generate mask schemes and teacher explanations for AI-assisted learning using React.js and an AI grading system to automatically evaluate student submissions, integrating with Node.js backend APIs
- Added custom image cropping functionality to enhance user control in image editing, implemented with React libraries
- Integrated Speech-to-Text (STT) and Text-to-Speech (TTS) features to improve accessibility and user interaction, leveraging browser APIs.
- Demonstrated expertise in developing both mobile and web applications with a focus on enhancing user experience

Data Pro (Itonics Labs) Jul 2023 - Nov 2023

Machine Learning Intern *Delhi (Remote)*

- Implemented machine learning algorithms and worked with Large Language Models (LLMs) like GPT
- Built high-performance and decision-making optimization.
- Gained hands-on experience with LangChain for building AI-integrated systems.
- Explored Generative AI with a focus on language generation, content automation, conversational agents

Education

Global Institute of Technology 2024

B. Tech - Computer Science and Engineering - ***CGPA - 8.9*** *Jaipur Rajasthan*

Relevant Courses, Mathematic, Software Engineering, Data Structure and Algorithms, DBMS, Computer Organization and Architecture, OOP in C++, Java, OS, Linux, Computer Networks

Projects

Pluc tv – Web application

Product – Pluc tv *React.js, Next.js, bootstrap, Mnode.js*

- Developed the platform **end-to-end**, handling both **admin and user modules**, including authentication, content management, and UI implementation.
- Built scalable, responsive interfaces and integrated secure APIs to deliver a seamless user experience.

Nxux – Recruitment Web Platform

Nxux – Recruitment Web Platform *React.js, Next.js, bootstrap, Mnode.js*

- Developed and maintained the **end-to-end recruitment platform**, including candidate management, job posting, and admin dashboards.
- Implemented **responsive and scalable UI** with secure API integrations to deliver a smooth user and admin experience
- Collaborated with cross-functional teams to **optimize workflows**, enhance security, and ensure on-time delivery of new features

AssessPrep – Online Assessment Platform

Product -AssessPrep *AWS (React.js, Ant Design, ruby on rails)*

- Developed core frontend features such as test creation, question editing, and real-time proctoring dashboard. Built and enhanced core frontend modules including test creation, question editing, and a real-time proctoring dashboard
- Implemented reusable UI components using Ant Design, ensuring responsiveness and cross-browser compatibility.
- Integrated RESTful APIs for dynamic data rendering and secure authentication workflows.
- Debugged and resolved performance issues using React DevTools and optimized API calls to reduce render cycle

Task Management Web Application.

Task Management app like Jira, linear *React.js, Ant Design, ruby on rails*

- Built dynamic UI components using React.js and Ant Design for task creation, filtering (status, priority).
- Designed filters and pagination for enhanced UX, allowing users to view tasks by status or assigned users.
- Integrated Redux for state management to handle task updates, user authentication, and comment handling efficiently.

Digital Library Management .

Library Management app *React.js, Ant Design, ruby on rails*

- Built dynamic UI components using React.js and Ant Design for task creation, filtering (status, priority).
- Designed filters and pagination for enhanced UX, allowing users to view tasks by status or assigned users.
- Integrated Redux for state management to handle task updates, user authentication, and comment handling efficiently.

Face Rekognition

Recognize faces based on pre-trained data *AWS (Lambda Function, Rekognition, DynamoDB, S3), TerraForm*

- Triggered AWS Lambda Invoke based on AWS S3 notifications to automate the training process
- Implemented storage of training data in an AWS Rekognition index in Vector form, mapped to individuals via DynamoDB

Tech Stack /Frameworks

- C, C++, JavaScript, Python
- Restful, Node Js, Express js, Node js, MySQL, PostgreSQL, MongoDB,
- React, Next, GatsBash, Tailwind CSS, Material UI, bootstrap Git.

Achievements

∗ National children's science congress Uttar Pradesh "District Child Science Award" National council of science Technology Communication (NCSTC- DST (Govt. of India)), Organized by VICAS.
∗ SHEAT TALENT QUEST (Inter-school quiz competition). First position in All over District Jan 2019, Sheat group of institutions, Varanasi
